

Angela Moss

DevSecOps Lead

Summary

Bridging the gap between development, security, and operations. Expert in shifting security left in the CI/CD pipeline.

Technical Skills

GitLab CI, SonarQube, Snyk, Docker, Kubernetes, Bash, Python.

Professional Experience

DevSecOps Lead | SecureSoft (2020-Present)

- Integrated SAST and DAST scanning into the GitLab CI pipeline, blocking critical vulnerabilities from reaching production.
- Standardized container base images across the organization to ensure patch compliance.
- Reduced container build times by 50% through caching strategies and multi-stage builds.

Build Engineer | GameDev Studios (2015-2020)

- Managed build farms for AAA game titles, ensuring nightly builds were delivered to QA by 8 AM.
- Scripted automated deployment tools for game server fleets.

Education

B.S. Computer Science, UCLA
