

David Chen

Senior Cloud AI Engineer

Summary

Specialist in AWS SageMaker and Generative AI. Proven track record of optimizing inference costs and building low-latency vector search solutions.

Technical Skills

AWS SageMaker, Bedrock, Pinecone, Python, Docker, FastAPI, CI/CD.

Professional Experience

Senior Cloud AI Engineer | CloudNative Systems (2019-Present)

- Architected a serverless LLM application using AWS Bedrock and Lambda, serving 50k daily active users.
- Optimized vector database costs by 40% through efficient chunking strategies and hybrid search implementation (OpenSearch).
- Collaborated with DevOps teams to implement 'Blue/Green' deployment strategies for ML models.

Machine Learning Engineer | FinTech Corp (2015-2019)

- Built credit risk scoring models using XGBoost deployed on AWS Fargate.
- Automated data ingestion pipelines using AWS Glue and Athena.

Education

B.S. Electrical Engineering, UC Berkeley
