

James T. Kirkman

Senior Site Reliability Engineer

Summary

Veteran SRE with 15 years of experience ensuring 99.999% availability for high-traffic e-commerce platforms. Expert in incident management and chaos engineering.

Technical Skills

Linux, Bash, Ansible, Datadog, PagerDuty, AWS, Python.

Professional Experience

Senior SRE | ShopScale (2018-Present)

- Led the 'Black Friday' war room, maintaining 100% uptime during traffic spikes of 100k requests/second.
- Implemented Chaos Monkey testing in production to identify and fix single points of failure.
- Automating incident response runbooks using StackStorm, reducing MTTR by 40%.

Systems Administrator | NetServe (2010-2018)

- Managed 500+ bare-metal Linux servers across 3 data centers.
- Migrated physical infrastructure to a hybrid cloud environment using VMWare and AWS.

Education

B.S. Information Technology, Purdue University
