

Michael O. Adebayo

Generative AI Specialist

Summary

Researcher turned Engineer with deep expertise in Transformer architectures and semantic search. Passionate about building 'Chat with your Data' applications.

Technical Skills

LlamaIndex, Haystack, Python, HuggingFace, Neo4j, GraphRAG, React.

Professional Experience

Generative AI Specialist | InnovateHealth (2022-Present)

- Built a secure internal chatbot for doctors to query patient history using GraphRAG and Neo4j.
- Fine-tuned Llama-3 models on medical datasets to improve terminology recognition by 45%.
- Implemented role-based access control (RBAC) within the RAG pipeline to ensure data privacy.

AI Researcher | University of Toronto (2018-2022)

- Published 3 papers on efficient attention mechanisms in Transformers.
- Collaborated with industry partners to apply NLP research to legal document review.

Education

Ph.D. Computer Science (NLP Focus), University of Toronto
