

# Priya Patel

*Data Engineer (AI Focus)*

## Summary

Data Engineer specializing in building the data foundation for AI. Expert in unstructured data processing, vector embeddings, and real-time streaming.

## Technical Skills

Apache Spark, Kafka, Airflow, Weaviate, Python, Scala, Azure Data Factory.

## Professional Experience

Senior Data Engineer | OmniRetail (2019-Present)

- Built a real-time embedding pipeline using Kafka and Spark Streaming to update product vector indices instantly.
- Processed 50TB of unstructured customer review data for sentiment analysis training.
- Designed a 'Lakehouse' architecture using Databricks Delta Lake to unify streaming and batch data.

Data Engineer | LogiTrans (2016-2019)

- Developed ETL pipelines using Airflow to ingest supply chain data from 20+ sources.
- Optimized SQL queries on Snowflake, reducing dashboard load times by 60%.

## Education

M.S. Data Analytics, NYU
