

Sarah Jenkins

Lead MLOps Engineer

Summary

DevOps-native AI Engineer focused on the intersection of infrastructure and Machine Learning. Expert in Kubeflow, Argo Workflows, and GPU cluster management.

Technical Skills

Kubernetes, Kubeflow, Python, Go, Terraform, GCP Vertex AI, Prometheus.

Professional Experience

Lead MLOps Engineer | Nexus AI (2021-Present)

- Managed a 500-node GPU cluster on Google Kubernetes Engine (GKE) for training large language models.
- Implemented Argo Workflows to automate retraining pipelines based on data drift detection.
- Reduced model inference latency by 30% using TensorRT optimization and model quantization.

DevOps Engineer | Streamline Tech (2017-2021)

- Built CI/CD pipelines for microservices architecture using Jenkins and Helm.
- Migrated legacy monolithic applications to Docker containers orchestrated by Kubernetes.

Education

B.S. Computer Science, University of Washington
